

An Intro to Me

Author / Anindya Shiddhartha

Hey there! My name's Anindya Shiddhartha. I'm 14 and I read in class eight. I live in Bangladesh with my family.

I was born in January 3, 2006 in a hospital in Dhaka. I lived in Dhaka for about nine years. After that chunk of time, I moved to Gopalganj with my family members due to my mother's work-purposes. I've completed my primary education from a school here named Resma International School in 2017. Then from 2018 to now, I am studying in a high school and am currently reading in class eight.

I live in a happy family consisting of four members. They are my father, my mother, my younger sister and me. My father and mother are both teachers. My mother takes care of me and my studies and makes delicious recipes for us. My younger sister is 10 and she likes to play and chat with me.

My hobbies are drawing and coding. When I reward myself an amount of free time after studying, I usually try to practice one of my hobbies. Drawing, as my hobby, is in my mind for quite a lot of time now. I've drawn many different structures, especially houses, ships, monuments etc. Now when it comes to coding, I simply love it. I spend most of my leisure coding and enhancing different types of applications.

My favorite colors are black and blue. My favorite food combo is fried chicken legs with a little amount of ketchup and fried rice. My favorite fruit is watermelon, and that being said, mangoes are in the second place. My favorite device is my laptop.

My aim is to become a software engineer in future, and I am preparing myself for it. But at the end of the day, I love myself more than anyone else!
