

An Intro To Me

Hey there! My name is Anindya Shiddhartha. I'm 15 and I read in class nine. I live in Bangladesh with my family.

I was born on January 3, 2006 in Dhaka. I lived in Dhaka for about nine years. After that chunk of time, I moved to Gopalganj with my family members due to my mother's work-purposes. I've completed my primary education from a school here named Resma International School in 2017. Then from 2018 to now, I'm studying in a high school and am currently reading at class nine.

I live in a happy family consisting of four members. They are my father, my mother, my sister and of-course, me. My father and mother are both teachers. My mother takes care of me and my studies, and also makes delicious recipes for us. My younger sister likes to chat with me. On the other hand, my father is my best friend of all time.

My one and only favorite hobby is coding. When I reward myself an amount of free time after studying, I usually take out my laptop from the bag and open my code editor and start coding. I try to think of many interesting ideas to practice on. But most of the time I do some work on my existing major projects. Other of my hobbies include drawing and sight-seeing.

My favorite color is black. My favorite food combo is fried chicken with a bowlful of fried rice and some Chinese vegetables. My favorite fruit is watermelon, and that being said, mangoes are in the second place. My one and only favorite device is my laptop.

My aim is to become a software engineer in future, and I'm preparing myself for it. I'm constantly trying to learn new programming languages and frameworks one after another to enhance my skills. And at the end of the day, I love myself more than anyone else!
